

Target areas of unwanted fat

LIPOTHERME™
BY OSYRIS

If you've tried diet and exercise and still can't get rid of unwanted bulges, consider this. Lipotherme laser lipolysis is a proven, safe and effective procedure that eliminates unwanted fat.

Dr. Louis Acosta M.D. performs this minimally invasive procedure using local anesthesia so you are awake the entire time. A single or multiple area can be treated and you'll be back in action the next day. All it takes is one treatment.

To learn how you can remove unwanted fat, call Dr. Louis Acosta M.D. at 310-659-8488 to schedule a confidential consultation or visit www.primaryskincare.net for more information.
